## Advanced Design with Improved Security

The AX series safe deposit boxes offer attractive, low cost modular construction and minimal upkeep.

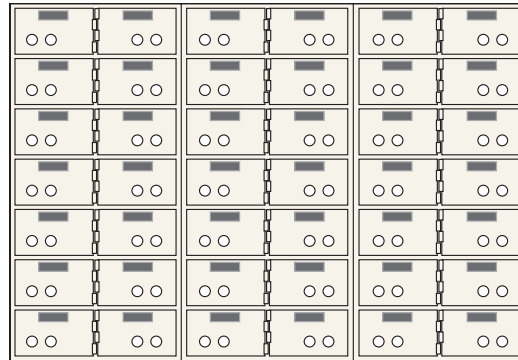

### Construction

The AX series combines  $\frac{1}{2}$ " solid alloy doors faced with stainless steel with cabinets of powder coated rust-resistant steel. For high security, the doors are designed with a heavy flange which interlocks with the door jamb.

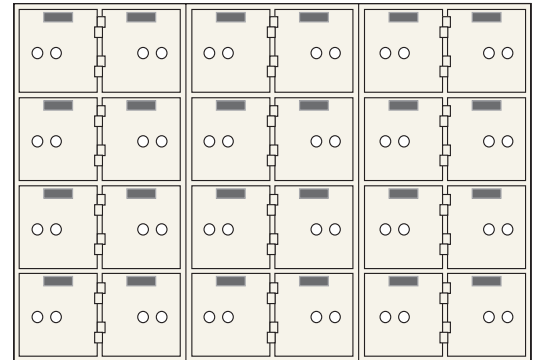

The modular cabinets can be stacked in sections, and bolted together through pre-drilled holes in the frame for easy installation. The AX series can be installed against the vault wall, utilizing every inch of valuable wall space.

### Bases

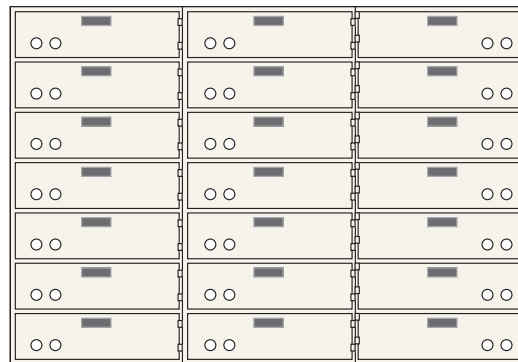

Bases are constructed of heavy duty tubular steel and finished in stainless steel to match the boxes. Standard bases are 3" high and equipped with leveling legs.

## Choose the Right Configuration for Your Needs

### Locks

As standard, doors are fitted with a double nose, key changeable lock both guard and customer side, and are U.L. listed. Locks are firmly attached to the door at four points to aid in prevention of punch attacks. Two customer keys in a sealed, numbered envelope come standard.

### Number Plates

Glare-resistant matte finish number plates are recessed into a customized frame which compliments the stainless steel and anodized aluminum finishes.

### Bond Boxes

Metal bond boxes are furnished in all sizes inside each opening. Boxes are constructed from sheet metal, treated for rust resistance, and powder coated with an enamel finish.

### Pull-out Shelf

An optional pull-out shelf for the convenience in handling customers' bond boxes is available. These shelves stack between two sections of AX boxes. When not in use, they are virtually undetectable. The shelf is framed in heavy gauge steel, and finished in stainless steel to match the boxes.
